Summary

I am a results-oriented Front-End Engineer with more than 8 years of experience in developing and optimizing high-performance web applications.

Passionate about continuous learning and professional growth, I am committed to exceeding expectations through excellence in development, communication, and collaboration. My ability to work effectively with teams ensures successful project completion on time and within budget.

I have experience providing code review and mentoring junior developers, helping them improve their technical skills and solve problems.

I have a proven track record of delivering measurable results, including:

- Optimized performance, reducing page load speed by 30% and significantly boosting conversion rates.
- Implemented testing systems using Jest, Vitest, and Cypress, achieving a 35% reduction in bugs and enhancing software reliability.
- Developed and streamlined CI/CD processes using Vercel and GitHub Actions, cutting deployment time by 40%.

Experience

Senior Full Stack Engineer

«SWAG 42» / Poland, Warsaw / 09/2022 - Present

- Building and refactoring web applications using Vue.js, Pinia, Vue Router, Nuxt, TanStack Query.
- Building and refactoring web applications using React, Next.js, Redux, TanStack Query.
- Developing and maintaining a scalable TypeScript codebase, ensuring type safety and minimizing runtime errors.
- Leading code reviews and mentoring junior developers to improve code quality and team effectiveness.
- Designing and documenting REST APIs using Node.js, Express.js, Supabase, and Joi (validation/auth).
- Implementing unit tests with Jest, integration tests with Vitest, and end-to-end (E2E) tests using Cypress.
- Integrating and managing CMS solutions such as Supabase, Strapi, and Directus.
- Optimized critical user flows, reducing page load time by ~25%.
- Implementing responsive, adaptive, and cross-browser-compatible layouts.

Senior Frontend Engineer

«Imedia Solutions» / Belarus, Minsk / 12/2021 - 08/2022

- Building and refactoring web applications using Vue.js, Vuex, Vue Router, Nuxt, TanStack Query.
- Conducting peer code reviews and sharing best practices to improve quality and consistency.
- Implementing unit tests using Jest and end-to-end (E2E) tests with Playwright.
- Working with REST APIs and Server-Side Rendering (SSR).
- Implementing responsive, adaptive, and cross-browser-compatible layouts.
- Improving maintainability of legacy codebases through modularization and cleanup.

Frontend Engineer (Junior → Middle)

«New site» / Belarus, Minsk / 07/2017 - 11/2021

- Building and refactoring web applications using Vue.js, Pinia, Vue Router, Nuxt.
- Building and refactoring web applications using React, Next.js, Redux, TanStack Query.
- Participating in code reviews and helping teammates resolve issues and improve implementations.
- Creating website layouts and templates for the 1C-Bitrix CMS.
- Implementing responsive, cross-browser-compatible user interfaces.
- Refactoring existing codebases to improve maintainability and efficiency.

Skills

Programming Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks and Libraries: Vue.js, Vuex, Vue Router, Pinia, Nuxt, TanStack Query, React, Redux, React Router, Next.js, TanStack Query

Build tools: Webpack, Gulp, Grunt, Vite, Rollup

Style tools: Tailwind CSS, Sass, Less

Auto testing tools: Cypress, Jest, Vitest, Playwright

UIKit: Element Plus, Vuetify, Ant Design, Nuxt UI, Radix UI

Backend: Node.js, Express.js, Joi, JWT, NestJS, Prisma, SQL, Python

CI/CD: Docker, Vercel, GitHub Actions

CMS: 1C-Bitrix, Strapi, Supabase, PostgreSQL, Directus, WordPress

Others: Axios, REST API, jQuery, Bootstrap
